Mr. Tom Wheeler,

As a 31-year-young voting American citizen I want you know that I support REAL Net Neutrality, with no back-door openings or loopholes which will allow ISPs to offer large corporations & big businesses access to higher speeds than others.

This concept is crucial to the future of our country, freedom, and economy. Creativity, innovation, scientific discovery, and technological advancements will be the lifeblood of our country if it's to prosper in the new world economy for generations to come. All of these pursuits will become handicapped by a tiered internet access system.

Please change your direction to preserve equal access speeds for all, & to ensure future generations will have the same opportunities my generation had - coming of age & innovating new American businesses which will become the future of our economy in the globally connected world.

What may seem like currently reasonable commercial concessions could potentially handcuff America's future. Do the right thing and act now for REAL Net Neutrality.
